DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to claims 1 and 14, the art on record teaches generating a management code with a cryptographic algorithm that is based upon an encryption key and identification data of a first chip card and storing the management code in the chip card. The art on record teaches permitting access to data stored on the first chip card only if a code presented by a user is compatible with the management code. The art on record further teaches generating a second management code in accordance with a cryptographic algorithm and storing the second management code in a second chip card and permitting access to data stored in the second chip card only if a code presented by a user is compatible with the second management code.

However, the art on record does not disclose, teach or fairly suggest generating a second management code in accordance with a second cryptographic algorithm that is based upon data relating to the first chip card and identification data of a second chip card.

3. The dependent claims, being further limiting to the independent claims, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
